separate servers, computers, and devices. The Web is the medium we use to access, edit, discover, and share information (through links) according to a standard language: HTML.

The Difference Between the Internet and World Wide Web ...

The World Wide Web, or simply web, is a way of accessing information over the medium of the internet. It is an information-sharing model that is built on top of the internet. The web uses the HTTP protocol, only one of the languages spoken over the internet, to transmit data.

The Difference Between The

Where To Download Internet And World Wide Web How To Program By

As mentioned on the previous page, the World Wide Web makes use of hypertext to access the various forms of information available on the world's different networks. This allows people all over the world to share knowledge and opinions. We typically access the Web through browsers, like Internet Explorer, Chrome and Mozilla Firefox. By using browsers like these, you can visit various Web sites and view other online content.

World Wide Web | Home

The terms Internet and World Wide Web are often used without much distinction. However, the two terms do not mean the same thing. The Internet is a global system of interconnected computer networks. In contrast, the World Wide Web is a global collection of documents and other resources, linked by hyperlinks and URIs.

World Wide Web - Wikipedia

The World Wide Web is a global information medium which users can access via computers connected to the Internet. The

Where To Download Internet And World Wide

Web is often mistakenly used as a synonym for the Internet itself, but the Web is a service that operates over the Internet, just as email and Usenet also do. The history of the Internet dates back significantly further than that of the World Wide Web.

History of the World Wide Web - Wikipedia

The web, which is short for World Wide Web, is one of the ways information is shared on the internet (others include email, File Transfer Protocol (FTP), and instant messaging services). The web is composed of billions of connected digital documents that are viewed in a web browser, such as Chrome, Safari, Microsoft
