one is at least partially “translucent,” i.e., where one’s trustworthiness can be at least somewhat reliably inferred by observers, having a trustworthy disposition can be beneficial because of the trust it engenders, even though this will mean forgoing opportunities to exploit that trust (Gauthier 1986).

Superintelligence Does Not Imply Benevolence

Abstract As machines become capable of more autonomous and intelligent behavior, will they also display more morally desirable behavior? Earth’s history tends to suggest that increasing intelligence, knowledge, and rationality will result in more

Superintelligence Does Not

It should be obvious, if an intelligence has (or is given) a malevolent goal or goals, that every increase in its intelligence will only make it more capable of succeeding in that malevolence and equally obvious therefore that mere super-intelligence does not ensure benevolence.

“Superintelligence does not imply benevolence ...

"Superintelligence does not imply benevolence": Extended abstract. ... including benevolence towards relatively powerless entities such as nonhuman animals. To evaluate the analogy between the expansion of cooperation to date and the behavior of possible artificial intelligences, we distinguish three ways in which increased intelligence might ...

Superintelligence Does Not Imply Benevolence Miri

“Superintelligence does not imply
benevolence.” We argue that this is
because goal selection is external in
their definition of intelligence and that
an imposed evil goal will obviously
prevent a superintelligence from being
benevolent. We contend that
benevolence is an Omohundro drive
(2008) that will be present

Superintelligence Does Not Imply

Access Free Superintelligence Does Not

Imply Benevolence Miri

“Superintelligence does not imply benevolence” because intelligence is merely the ability to fulfill goals and if an entity begins with a malevolent goal, increasing intelligence while maintaining that goal will only guarantee increased malignancy. Yudkowsky (2001) tries to avoid this problem via a monomaniacal “Friendly” AI enslaved by ...

Superintelligence Does Not

Explosion by David Pearce The God-like perspective-taking faculty of a full-spectrum superintelligence doesn't entail distinctively human-friendliness any more than a God-like superintelligence could promote distinctively Aryan-friendliness. Indeed it's unclear how benevolent superintelligence could want omnivorous killer apes in our current guise to walk the Earth in any shape or form.

Does Full-Spectrum Superintelligence Entail Benevolence ...

It clearly exposes the risks that may arise from General Artificial Intelligence, it indicates that superintelligence does not necessarily imply benevolence and it summarizes the last years of research on potential
